Course 2 Summative Quiz
Graded Assignment • 30 min

Due Jan 7, 11:59 PM CET

Your grade: 100%

Your latest: **100%** • Your highest: **100%** • To pass you need at least 80%. We keep your highest score.

1 / 1 point

1. Which of the following is not a potential disadvantage of using teams for problem solving?

- ○ Confidentiality may be an issue with team recommendations prior to management approval.
- ◉ Team decisions receive less support than decisions made by individuals working alone.
- ○ Teams take longer than individuals working alone.
- ○ Teams may experience peer pressure to avoid certain issues.

Correct
Correct. Team decisions tend to be of higher quality and creativity than individual decisions due to different perspectives on the problem and the ability to openly discuss all decisions. They also generally receive stronger support for the same reasons.

1 / 1 point

2. How many full-time members are recommended for Six Sigma project teams?

- ○ There is no recommended team size.
- ○ 2 - 3
- ○ 10 - 12
- ◉ 5 - 7

Correct
Correct. Six Sigma project teams should typically consist of 5 to 7 full-time team members, with other members participating on a limited / ad hoc basis as needed. Larger teams are difficult to manage and can have a big impact on the productivity of smaller organizations during team activities, and smaller teams may not be able to carry the workload required on large projects. But experience has shown that teams of 5 - 7 full-time members typically work very well.

1 / 1 point

3. Black Belts usually lead larger scale, cross-functional projects and Green Belts often lead smaller scale projects that are not cross-functional.

- ◉ True
- ○ False

Correct
Correct. Black Belts are usually used as team leaders for larger scale, cross-functional projects, but Green Belts are often used for smaller scale projects that are not cross-functional.

1 / 1 point

4. Which optional team member role is responsible for creating a record of the team's activities and decisions in place of the team leader?

- ○ Process Owner
- ◉ Reporter
- ○ Timekeeper
- ○ Champion

Correct
Correct. The team reporter will create a record of the team's activities and decisions. The Reporter is responsible for taking minutes of every team meeting, distributing minutes to team members and others as requested, and documenting the results of all team problem-solving activities.

1 / 1 point

5. What is the role of the project Champion in Six Sigma?

- ○ Prioritize the solutions identified by the team
- ○ Help with the team leader's responsibilities until the team leader is able to handle them alone
- ◉ Assist the team with any problems beyond the team's level of authority
- ○ Implement the process changes recommended by the team

Correct
Correct. Most Six Sigma projects have a Champion, who is a middle or senior level executive who sponsors that specific Six Sigma project. Their purpose is to help the team with any problems beyond the team's level of authority, such as ensuring that company resources are available to the team as needed and that any cross-functional issues are resolved.

1 / 1 point

6. Which Six Sigma team role is responsible for ensuring that the team stays on task and schedule, as defined in the project charter?

- ○ Project Champion
- ○ Process Owner
- ○ Timekeeper
- ◉ Team Leader

Correct
Correct. The team leader is responsible for ensuring that the team stays on task and schedule, as defined in the project charter

1 / 1 point

7. The Forming – Storming – Norming – Performing stages of team development apply to all Six Sigma teams.

- ○ True
- ◉ False

Correct
Correct. The stages of team development apply to many teams, but not all. Some teams skip stages, especially if they've worked together before or have experience with Six Sigma.

1 / 1 point

8. Which of the following best describes the atmosphere in productive Six Sigma team meetings?

- ○ None of these
- ○ Quiet and professional
- ○ Formal and orderly
- ◉ Informal and relaxed

Correct
Correct. The atmosphere is informal and relaxed with productive teams. This is important because when team members are comfortable with each other, they are more likely to communicate openly and honestly, and team creativity will be enhanced. Team leaders should monitor the team's development to make sure that the team is moving effectively through the Storming and Norming stages and becoming more comfortable working together.

1 / 1 point

9. Which Six Sigma tool is most useful for keeping teams aligned and all team members working toward the same goals?

- ○ DMAIC
- ○ Designed Experiments
- ◉ The team charter
- ○ Flowcharts

Correct
Correct. The charter is an important aspect of Six Sigma teams that will help keep your team working toward common goals which are well understood and accepted.

1 / 1 point

10. Harmony and agreement between individuals on Six Sigma teams are not assumed to be evidence of high performance.

- ◉ True
- ○ False

Correct
Correct. Diversity of opinion is encouraged in creative teams as long as it remains constructive. Harmony and agreement between individuals are not assumed to be evidence of high performance.

1 / 1 point

11. An agenda is not needed for Six Sigma meetings because the team already knows what they are working on during each stage of the DMAIC model.

- ◉ False
- ○ True

Correct
Correct. Agendas are important for Six Sigma team meetings because they let everyone know how to prepare for every meeting, they set priorities for every meeting to make sure the most important items will be covered first, and they keep team discussion focused on the right topics to stay on task and schedule.

1 / 1 point

12. What is the term used for a written record of the action items assigned by a Six Sigma team, the person(s) responsible for each action item, and the scheduled completion date for each action item?

- ○ Minutes
- ○ Agenda
- ◉ Action register
- ○ Charter

Correct
Correct. A written record of the action items assigned by a Six Sigma team, the person(s) responsible for each action item, and the scheduled completion date for each action item is known as as "action register."

1 / 1 point

13. Who usually provides company-specific information, such as the strategic plan, to a Six Sigma team?

- ○ The company's CEO
- ◉ Project Champion
- ○ Human Resources
- ○ Team reporter

Correct
Correct. Six Sigma teams need information about the organization to be able to make informed decisions when it comes to assessing the best direction to follow for improvement and whether or not a given improvement idea is the right one for the company. This requires training in company-specific information such as costs and budgets, customer requirements, process and system structure and function, and, of course, the company's goals and objectives. This information can usually be provided to the team by the team's Champion or the process owner.

1 / 1 point

14. Which type of differences can inhibit effective communication?

- ○ Differences in department of division of the organization
- ◉ All of the above
- ○ Differences in job or position
- ○ Differences in native language such as English vs. French

Correct
Correct. Language can inhibit effective communication since words can mean different things to different people, depending on their backgrounds, ages, education, and experiences. This includes not only differences in languages like English vs. Spanish, but also differences in terminology between different types of jobs, different companies, different departments, and so on.

1 / 1 point

15. It's usually a good idea to delay important or complex communications until times when the message receiver is less emotional.

- ◉ True.
- ○ False

Correct
Correct. Emotions, whether good or bad, happy or sad, excited or bored, can influence how a message is interpreted, so it's usually a good idea to delay important or complex communications until times when the message receiver is less emotional.

1 / 1 point

16. Active listeners try to understand what the speaker wants to communicate rather than what they want to understand.

- ◉ True
- ○ False

Correct
Correct. Active listeners show empathy. They try to understand what the speaker wants to communicate rather than what they want to understand.

1 / 1 point

17. Which of the following is typically not a warning sign that conflict on the team is becoming destructive?

- ○ Refusal to compromise
- ○ Apathy
- ◉ Members making eye contact with each other while speaking
- ○ Aggressive communication

Correct
Correct. Eye contact is a technique used by active listeners to focus their attention and encourage the speaker. If teams are making eye contact, they are probably trying to listen and support the speaker.

1 / 1 point

18. Which conflict handling style is usually the best alternative when both views are equally important, everyone's agreement is needed, and time is not limited?

- ○ Compromise
- ◉ Collaboration
- ○ Accommodation
- ○ None of the above

Correct
Correct. Collaboration requires identifying a new alternative that will satisfy all conflicting parties for a "win-win" outcome. Collaboration is usually the best alternative when both views are equally important and everyone's agreement is needed, but it can be very time consuming.

1 / 1 point

19. Six Sigma project team members who have different perspectives on the problem should be selected even though this is known to create conflict on a team.

- ◉ True
- ○ False

Correct
Correct. Conflict is common on project teams, especially when we deliberately select team members who have different roles within the organization and different perspectives on the problem. But we do this because we know that the conflict that results from these different perspectives can lead to greater creativity and better solutions, as long as it is managed effectively.
